DETAILED ACTION

Election/Restrictions

1. Applicant's election of Figures 1-9 in the reply filed on 6/17/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Sponsler et al.

Sponsler et al. disclose the claimed invention including shafts 48, 50, floor support brackets 50, 52, and first resilient member 61. Reference Figure 2. The spiral spring 61 has a spring force that is the largest when the seat cushion is in the horizontal seating position and the spring force decreases as the seat is rotated to a vertical position as shown in Figure 3.

Allowable Subject Matter

4. Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 13-16 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references generally relate to the claimed invention.
